

Setting Tabs in Chrome for Startup

Step 1 Open Chrome Browser

Step 2 On New Tab type your URL of the tab you want Chrome to show when opened. (repeat for each additional tab you want opened until you have them all)

Step 3 Click on the 3 dots upper right hand corner and select Settings in the menu

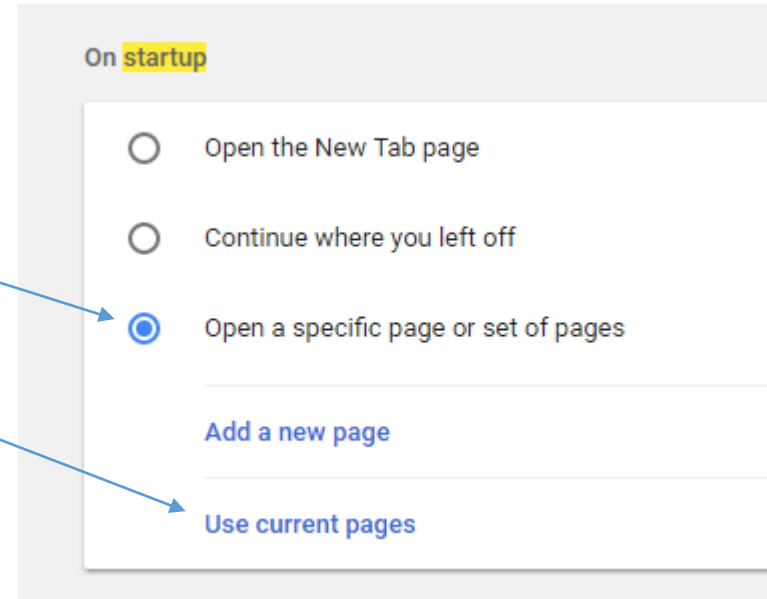

Step 4 Type Startup in the search settings box

Step 5 Select Open a specific page

Step 6 Click on Use current pages

Step 7 Restart the Chrome browser and all your selected tabs will be there.

NOTE: You can also remove unwanted tabs by following the same settings directions. Click on the 3 dots next to each tabbed website you want to remove and select Remove
